ASHWIN KIRBAA B.

AI & SOFTWARE DEVELOPER / COMPUTER SCIENCE ENGINEERING STUDENT

Coimbatore, Tamil Nadu, India | ashwinkirbaa17@gmail.com | github.com/AshwinKirbaa | linkedin.com/in/ashwin-kirbaa17

PROFILE

Computer Science Engineering student building practical AI, computer-vision, full-stack, and infrastructure systems. I work from problem framing through model or API integration, interface development, testing, and deployment, with a focus on useful end-to-end products.

EDUCATION

B.E. COMPUTER SCIENCE AND ENGINEERING

Sri Shakthi Institute of Engineering and Technology, Coimbatore | 2025 - 2029

Coursework and independent practice across software engineering, artificial intelligence, backend systems, databases, computer vision, and infrastructure.

SELECTED PROJECTS

SAFEBOX AI

AI security platform | Python, Docker, AI security

Evidence-driven testing for adversarial AI behavior, policy adherence, sensitive-data exposure, and sandbox isolation.

TWINEVAL AI

Semantic evaluation | Sentence Transformers, cosine similarity, full-stack

AI-assisted answer evaluation that compares semantic meaning beyond keyword matches. Published as a paper in IJRTI, Volume 11, Issue 10 (2026), Paper ID IJRTI2610875.

AI SECURITY CAMERA

Computer vision | Python, OpenCV, InsightFace

Real-time visitor identification using face detection, facial embeddings, recognition workflows, and live camera input.

GESTURE CONTROL

Human-computer interaction | Python, OpenCV, MediaPipe

Touchless computer controls built from hand-landmark tracking, gesture interpretation, and configurable actions.

DEXGET

Independent software project

A software build taken through implementation, testing, and delivery, with source available on GitHub.

TECHNICAL TOOLKIT

LANGUAGES	Java, Python, JavaScript
WEB + BACKEND	HTML, CSS, React, Vite, Node.js, Express, FastAPI, Vercel Functions
DATA + AI	PostgreSQL, MySQL, Scikit-learn, Sentence Transformers, NLP
VISION	OpenCV, MediaPipe, InsightFace
INFRASTRUCTURE	Docker, Docker Compose, Ubuntu Server, Portainer, Tailscale, Vercel

SELECTED ACHIEVEMENTS

- Hack in Hills 2026 - SafeBox AI advanced to the Top 500 from more than 10,000 teams.
- HackerRank Orchestrate - ranked #1,134 in an agentic AI challenge with 35,000+ registrations.
- IBM BOB 2.0 Hackathon - completed and submitted an agentic AI solution.
- HackDay 1.0 - collaborated under an eight-hour deadline to deliver a functional prototype.

PUBLICATION

SMART EVALUATION OF HANDWRITTEN ANSWER SCRIPTS

International Journal for Research Trends and Innovation (IJRTI), Volume 11, Issue 10, October 2026 | Paper ID: IJRTI2610875

Research associated with TwinEval AI, exploring semantic representations and similarity-based evaluation for written answers.

PRACTICAL SYSTEMS EXPERIENCE

LINUX HOME LAB

Maintain a Linux-based learning environment using Ubuntu Server, Docker Compose, Portainer, and Tailscale to practice deployment, service operations, container management, and private networking.

WORKING STYLE

Define the real problem, make the core loop work, test edge cases, then package and deploy the useful result. Comfortable moving between model experimentation, APIs, interfaces, databases, and infrastructure.

OPEN TO INTERNSHIPS, COLLABORATIONS, AND AMBITIOUS BUILDS
